Pediatric Product Features

The unique features of “AXON SOFTWARE” are;

- “AXON SOFTWARE” maintains a complete track of entire history of the patient and helps in augmenting diagnosis methodology through its analytical capabilities
- “AXON SOFTWARE” makes multilingual prescriptions and patient records to be printed more legibly, in an organized format.
- “AXON SOFTWARE” is fully customizable software. In a few minutes, it can be set up to work as the Doctor does. Its user-friendly operations enhance the pleasure of working with it, making it an integral part of practice, as time goes by.
- “AXON SOFTWARE” comes with a complete, exhaustive integrated ‘help’ file.

PATIENT RECORDS

- OPD

1. Patients’ personal details, complains, clinical findings, diagnosis, investigations and prescriptions all on mouse clicks.
2. Patient specific reminders that pop up on his every visit.
3. Allergies of a patient **related to** drug administration.
4. Important details related to a patient displayed on main screen itself.
5. Patient’s history retrieved / printed on a single click.
6. Growth charts
7. Record various patient vitals
8. Search patient by various demographic field wise
9. Multi-consultation module

- Indoors

1. Handle details of an indoor patient *in less than a minute*.
2. Discharge Summary generated *through the software itself*.
3. Provision to print multi-lingual prescription in discharge summary.
4. Modify / reprint a discharge summary.
5. Customization in discharge summary report print.

- Vaccination

1. Customizable Vaccine Schedules.
2. Vaccination related to vaccine stocks.
3. Vaccine order reminders can be set for individual vaccines.
4. Vaccine reminders through e-mails & SMS for patients.

- Certificates

1. Create your own pre-formatted templates for certificates / letters.
2. Generate patient specific certificates / letters at a click of a button.

- Photographs

1. Facility to add patient specific photographs / scanned images etc...
2. Capturing of image and video

PRESCRIPTIONS

1. Multilingual prescriptions in **English, Hindi, Marathi, Gujarati and Two other local languages** at a click of a button.
2. Provision for printing duplicate prescription.
3. Provision to show / hide information
4. Provision to prescribe medicine in tapering dosage
5. Provision to print generic drug names
6. Print digital signature
7. Create **several Standard Prescriptions** related to a diagnosis and retrieve them at a click.
8. Add next due vaccines, over-due vaccines, age related instructions, specific advise to prescription at a click of a button.
9. **Save on stationery** by using the back page and ½ page prescription facilities.

PATIENT REGISTRATION

1. Record patient demographics with medical history
2. Provision to print barcode
3. Merge duplicate patient
4. Family members linking
5. Swap case numbers
6. Export patient registration

APPOINTMENT

1. Book appointments
2. Multi-doctor appointments
3. Breakup of daily appointments on screen
4. In-patient view for patient display
5. Token printing
6. Block appointment & holiday calendar
7. Provision to dropout patient
8. SMS reminders

ACCOUNTS

- Bills

1. Generate indoor bills for the patient.
2. Transfer all details to receipt on single click.
3. Facility to create standard indoor bills.

- Receipts

1. Generate / Print receipts for patients through the software.
2. 3C register gets generated automatically.
3. Facility to keep track of advance received and discounts given.
4. Facility to correct a wrong entry in receipt.
5. Facility to accept all payment modes (Cash, Cheque, E-Wallet, NEFT, UPI).
6. Facility to handle Company patients and company-wise accounts

7. View patient ledger

- Daily Transactions

1. **Single screen** for entry of any other income, all expenses through cash or cheque during a day.
2. Track investments during a period.

REGISTERS

Automatically generates & maintains:

1. OPD Register
2. Indoor Registers
3. Vaccine Administration Register
4. Vaccine Stock Register
5. 3C Case Register
6. Indoor Bill Register
7. Company patient Register
8. Pending professional fees Register
9. Income & Expense Register
10. Bank-wise transactions records
11. Investment records

EDUCATIONAL PHOTOGRAPHS

Attach as many educative photographs as you wish and retrieve them at a click of a button.

ABOVE ALL

- Analysis of Patient Data

1. Find out the number/details of new / old / lost patients during a period.
2. Find out the number/details of patients with a specific disease, administered a specific medicine, subjected to certain test or any of this combination...
3. Find out the number/details of patients referred by a certain doctor.

DATA BACKUP

1. Take daily, weekly secure backup
2. Provision to take backup on Cloud*
3. Provision to setup Auto backup
4. Easy data restoration

EASY Upgrade

1. Online page to know latest updates
2. Download your update
3. Provide your suggestions and inputs for improvements

HELP

The software comes with an **in-built** help that guides you through the entire software.

Additional Features – Developed for IAP

1. The software is compatible for use with digital / web camera so that photos/video recording of the patient may be attached with his data file.
2. Patient's Image management & Video file management implemented.
3. Facility to generate prescriptions in different languages. The user can able to select the font that he wants to use and be able to word the instructions in selected language.
4. The software has the facility to upgrade the drugs from the IAP drug formulary.
5. Default vaccination schedule in the software is as recommended by IAP.
6. The age related data for head circumference, height and weight shall be changed to that provided by IAP. BMI, Expected height of the child shall be calculated by the software.
7. Growth chart of Weight, Height, Head Circumference, BMI implemented as per data provided by IAP.
8. Facility is given to enter the height of mother and father and expected height of the child shall be calculated.
9. The diagnosis can be reworded as per ICD codes.
10. Facility to update ICD code whenever new version released.
11. Complete software has designed on higher end database MySQL Server.
Data storage capacity reliability of the software is improved due to higher end database.

Advantages

- "AXON'S SOFTWARE" is an effective tool for patient data management, retrieval and analysis. It is a product designed to win hearts – both of the Doctors and the patients.
- "AXON'S SOFTWARE" organizes patient care better, with lesser efforts thereby increasing doctor's efficiency - allowing them to concentrate more on patients than on paperwork; resulting in increased respect and continuous patronage from their patients.

"AXON'S SOFTWARE" helps effortless maintenance of all records, to meet doctor's personal as also all statutory requirements

Version Upgrades

Version 2.0 – Released in January 2009

Features at a glance:

Main Screen

1. Calculate Dosage in 'ml' up to decimal points below 1 ml, e.g. 0.1, 0.2,0.25, 0.3 etc...

5. Print registration number on Rx.
6. Print investigation advised in bold letters.

Clinical Notes Template

1. Provide search facility for third level in clinical notes.

Vaccine Schedule

1. Facility to generate vaccine schedule by months and years apart from days.
2. Print vaccine schedule blank report from vaccine schedule master.

Vaccine Report

1. Set proper top margin on second page in vaccine report.
2. Make/Batch/Remark should be optional on 'Adm.Report' printout. (Optional)
3. Print proper full name of patient on vaccine admin report.

4. Print specification for given status: "Given as per the history given by patients".
5. Facility to add vaccine report header. There shall be facility to type for multiline header.

Growth Chart

1. Allow user to set Print orientation for Growth Chart. Export to excel and allow user to set print orientation and also other properties for print.

History

1. Facility to generate text file for patients visit wise with visit history & patients attached files, so that user shall able to email it.

Medicine Master

1. Drug group and formulation should not get cleared on save or delete of any medicine.

Receipt

1. Facility to print bill no. in indoor receipts.
2. Print accounting year in receipt beside receipt no.
3. Print registration number on receipt.

Appointment Schedule

1. Print report for Appointment Schedule.

Vaccine Reminder

1. Vaccine reminder shall be generated as selected, date wise not week wise.

Discharge Summary

1. Print discharge weight on discharge summary.
2. Print age of patient on discharge summary.
3. Facility to create own list for "Condition of Admission & discharge".

OPD Register

1. Search facility for content of 'Clinical notes' in OPD Register.
2. Bar charts on OPD register for total patient and total receipts per day or per month.
3. Facility to search by DOB in OPD register

Address Book

1. Facility to enter second address details.
2. Envelope print on address book.
3. Category wise search on selection list on address book.

Standard Indoor Bill

1. Facility to print 'Standard Indoor Bill'
2. 'Reception' user also can print 'Standard Indoor Bill'

Theme

1. Allow user to select theme from default samples.

Investigation Master

1. Search facility on Investigation Master
2. Facility to delete sub items of standard investigation.

Master Menu

1. Make separate menu for Master.

Margin for Reports

1. Separate print setup for registers
2. Facility to set 'Top' and 'Left' margins for 'For Nurse' in indoor records.

Software Registration

1. Display remaining days for software registration
2. Registration content provided on the registration page for 'Get Key'.

Options

1. User shall able to set backup reminder days.
2. Allow user to start with any receipt # for the first time, so that user can continue from where user stopped generating manual receipts.

Backup

1. Generate folder structure of the backup data week days wise on selected drive.

Version 3.0 – Released in January 2010

Features at a glance:

Never Before

- Swap, reorder and delete Case numbers
- Delete Receipts
- Added security for editing receipts
- Employee Muster
- Export registration and clinical information for a range of case numbers
- Search patients by their birth dates and age group.
- Search for admitted patients 'date wise'

Prescriptions

- DOB does not get printed if it's approximate.
- Print temperature in place of DOB in Rx, if DOB is not printed
- Change and set printing order of the medicine as desired
- Print medicine related instruction on second line and special instruction on third line
- Drops calculation in round figures, without decimals
- OPD charges can optionally be printed in footer
- Delete the [*] mark from administered vaccine
- Option to copy previous Rx without clinical notes
- Clear Rx removes diagnosis completely, but not the next visit date
- Popup message if 'next visit' date is blocked for appointments
- Prompt for Next visit on print. Next visit generated as entered, or none if not opted
- Add medicines in 'chronic medicines' list
- Improved space management in footer

Alternate Medicines

- Open and select medicines using keyboard only

Patient Management

- Birth weight displayed as tool tip on the 'weight' text box.
- Previously given advice seen when saved visit is re-opened
- Patient weight & age displayed on 'View Rx' screen
- Display last visited days beside the last visited date.

Vaccination

- Print vaccine brand name with vaccines given
- 'Show Schedule' expands vaccine section automatically
- View vaccines given on a particular visit

Ward Details

- Customizable title for each bed in the ward
- Prints nurses' orders ward wise
- Display of patient name, diagnosis and admission date

Discharge Summary

- Set margins for the discharge summary
- Weight at admission copied over if discharge weight is entered while prescribing medicines
- Select medicines from Standard Rx
- Clear medicines temporarily from Standard indoor list to add on discharge summary
- Rx from first indoor record copied over to treatment given section
- Titles not printed if no data is entered
- Print medicine instructions in local language like a regular prescription
- Print DOA & DOD time in report discharge summary
- Prints weight in discharge summary
- Prints today's date if discharge date not found

10. Digital signature for doctor in prescription, discharge summary, receipts, vaccine report, indoor rx, indoor bill.
11. Separate print setup provided for vaccine report.
12. Patient weight and height should get copy if patients come within given period of time.
13. Facility to sort DOB column by ascending and descending on patient search.

Version 5.0 – Released in June 2012

Features at a glance:

A. Vaccination:

1. Define Vaccine Pack with its substitutes:
 - Vaccine schedule shall have option to define substitute vaccines in particular vaccine. Whenever any vaccine have substitute vaccines define then on patient vaccination all those substitute vaccines will be marked as NR (Not Required). By this way vaccine schedule will not show those vaccines in due. This feature introduce for vaccines like Pentavac, Pentaxim and etc.
2. Vaccine schedule re-ordering facility – provide sorting functionality instead of Order.
3. Vaccine schedule should exclude the planned holiday's dates for patient schedule.

B. Discharge Summary:

1. Document print of discharge summary should be improved to occupy minimum space for patient information in header. E.g. If bed number contains more characters then it distort the printout.
2. Print patient address and contact number in report. Local Address, Residence and Mobile
3. Up/Down option for medicine similar to OPD.

C. Service tax in Receipts

Include option for service tax on receipts. This should be optional (Apply S.T.) on receipt screen. If a particular patient does not want to service tax receipt then it can be a normal receipt as per current. Service tax should apply on discounted amount.

1. Print service tax in receipt
2. Include service tax column in 3c case register and print.
3. Default can be define for S.T. Rate, S.T. Apply (Include / exclude from patient receipt)
4. PAN Card number can be printed in receipt print after doctor name.
5. If S.T. is collected then receipt will print the S.T amount. This will not be ignored.

D. OPD Patient:

1. Search facility for patient City on OPD Register
2. Show timer as soon as patient selected for OPD on main screen. This will give idea to doctor for the time spent on particular patient. *Optionally / Performance measurement will be required.*
3. Shortcut key for Last Patient CTRL + L
4. OPD Patient referred by doctor register.
5. Print/export report from patient search
6. Show age column in grid on patient search screen.
7. Patient label print should exclude contact number (Optional)
8. Show popup for diagnosis precautions on main screen similar to drug. (Optional)

9. Allow to print logo in Rx print. In such case second doctor name might not be printed.
10. Allow doctor to fix appointment on next visit date or ask prompt popup once click on Save.
11. Auto navigate on Appointment screen on save of the patient from main screen. (Optional)
12. Remove Time from the Rx. (Optional)
13. Show medicine instructions and special instructions in separate window on right click so that user can see full instructions.
14. Standard Rx shall allow user to define instructions and special instructions for medicines apart other details.
15. Show prompt to edit same day visit on subsequent visit on same day for the patient. E.g. patient comes for 1st time in morning and again comes 2nd time in noon or evening then software show prompt to edit 1st time visit entry or can create new visit. This way if extra visit record is not required then existing visit entry can be updated.
16. Open Today's patient window without any password prompt. (Optional)
17. Advice search should be done by any key word search and not only by first keyword. Same for instructions and special instructions.
18. Utility to remove duplicate patient entries.
19. Mapping to Birth History, Family History & Past History from Clinical Notes on patient first visit.
20. Quick window to add new medicine from Main Screen itself with minimum fields.
21. Re-ordering medicine facility on Standard Rx edit.
22. Defaults for temperature field in OPD and range improvement in number table (range between 90 and 110).
23. Larger font size for Number selection window for Height, Weight, HC and Temperature. For Weight range will be up to 70 kgs., HC between 30 and 55
24. Record keeping for Telephonic consultation. - Case no, Name, Relative Name, Contact number, Purpose of calling and remarks
25. New information in medicine for Taste of Medicine, Doctor Cost and MRP details.
26. Mark patient visit for "Without File" and highlight it on past visit by color coding.

E. Patient Detail:

1. Drop down list option for Place – other on patient details.
2. Add field for Obstetrics history.

F. Common Reminder:

1. All reminder can be printed and exported in excel.

G. Appointment:

1. Show temperature in appointment grid beside "In Time" column.
2. Enable more security for amount collected at reception end.
3. Visited patient appointment should not be deleted by doctor user.
4. Track cleared appointment collected as and when done. Log will be maintained and register will be provided.

5. Patient can be selected from the list during the typing in name box to omit the duplication registration problem.
6. Token printing facility is added
7. Separate appointment token view is given for patient.

H. Super Admin

1. New user role shall be introduced to perform the critical operations such as Delete Patient data, Delete visited patient appointment, cleared appointment collected amount.
2. Options screen management by super admin.

I. Bug:

1. Advance functionality is not working in Indoor Bill.
2. Show age group reminder for new patient once patient is registered.
3. Calculate patient age from birthday date and currently it is calculating one day short.
4. Number conversion screen shall be opened directly.
5. Letter screen shows past date in calendar.
6. Main screen gets opened up from reception password on close of Daily Transaction screen. new
7. SMS Vaccine reminder should not include vaccines marked as NR. new

J. Error Handler

User friendly message is required for below area of errors:

- Connectivity error related to ODBC Driver
- Connectivity error related to unknown server/host
- Backup error related to UAC.

K. Backup Utility

1. Similar to “Week wise” backup “Day wise” backup facility will be provided.
2. Auto backup facility will be introduced.
3. For better tracing Error logging for backup batch and restore batch files.

L. Holiday Management: *New*

1. New feature implemented for Holiday Management to set the holidays in software
2. Holiday can block appointment, patient next visit suggestion and appointments.

M. Revised Suggestions: *New*

1. Incorporate new rupee symbol as currency code in receipt print.
2. Validation for patient appointment for same patient available in appointment schedule.
3. Pending professing fees with date and type.

Version 6.0 – Released in January 2016 – Release I

Axon Pediatric Software has been upgraded with many new features from the feedbacks received from the customers. Please have a look on the below features.

Features at a glance:

A. Patient Management

1. Patient gender/sex information can be removed from prescription print
2. Medicine quantity can be removed from prescription print. Quantity can be written manually at convenience on prescription.
3. Previously prescribed medicine will be highlighted once medicine is selected on main screen.

support@dot2dot.co.in

END.

Version 6.7 – Released in July 2016 – Release II

Minor version under version 6 with further improvements of software

1. New payment mode as Credit and Debit card included for Receipts
2. Patient address print in Rx will be Optional (Use software options screen to change)
3. Bulk receipt changes
4. All holidays can be set as optional
5. Reschedule appointment patient entries
6. Option to copy Local address to permanent address
7. Previous day's receipts from the pending dates can be issues.
8. Include ward details in final indoor bill print
9. Apply discounted amount for indoor bill
10. Vaccine buying price can be added along with vaccine schedule. This will allow viewing the buying and selling price from the master itself during vaccination (In case stock is not maintained, this will be substitute feature to get knowledge about the fees).
11. Updates in Label printing
12. Cursor reset to medicine column after selection of alternate medicine.
13. Retrospective entry window will not get closed automatically after save.
14. Day and night shift entry time is possible in staff daily entry.
15. Print label option on Appointment and Registration screen
16. Select date from the calendar control on certain areas.

Version 6.7 – Released in November 2016 – Release III

Considering real customer need to accept payment via other than cash, we have introduced new payment mode options in Pediatric Software in November 2016.

Earlier Cash, Cheque and Credit/Debit Card were already introduced. Now we have also included few more like eWallet, NEFT and UPI. There are additional fields like Card No and Patient Bank can be used to store some of the values like Account Number and respective Vendor in Patient Bank.

As payments are being stored in software with various modes, it's necessary that software should provide summary of each payment mode and filters in accounting report. Few changes have been made in 3c Case Register and Date wise Register to solve the purpose. This is explained by showing screenshot with in this document.

Features

1. **Generate receipt for any payment mode from Main Screen.** “Other Mode” option is to accept payment by any other mode. Dropdown is given to choose the option.
2. **Generate receipt for any payment mode from Receipt (F3) screen.** This screen is useful for reception user. They also can generate the receipt with specific payment mode. In case you are generating the receipt from main screen in “cash” and reception accept payment from patient in other than Cash, then they can change the payment mode as per the patient need from the available option. But this only can be done once by reception user.
3. **Change Cash receipt to any other payment mode from 3C Register.** From 3c Case Register, any receipt can be change to Cash to any other mode. Again rules is applied that Cash to any other mode is possible but any other mode to cash or any other mode is not possible. This option is only for the Cash receipt.

4. **3C Register Payment Mode Filter.** On 3C register, you will see new dropdown for Payment mode beside head wise report button. Select respective mode and your 3c Report will be filter accordingly. Along with this Payment Mode, Card Number and Patient Bank columns are added in 3c Case Head wise Register and Export. So that you can have better look on how the payment has came.

5. **Summarize collection by Payment Mode.** In case quick summary is needed for month wise or any date wise then use 3c Case Date wise. Here we have introduced new option called “Include Mode” for Head wise report. Check mark on this to view Head wise report with Payment Mode wise bifurcation on each day and also summary for the given date.

Version 2017 – Released in February 2017 – Release I

Lot have been improved and added in new version of Pediatric software after successful release of version 6.0. From 2017, now we have renamed the version number to year wise.

Following are the new addition in AXON software:

1. Patient label with barcode. More information added in patient label like DOB, Age, Gender, Address and Contact Information. Label printing is available on Patient Registration, Appointment and Patient search screens.
2. On patient registration screen, duplicate patient prompt will be appeared in case mobile number is matching with existing patients. Software will allow to register patient with same mobile number in case needed.
3. New screen added to view all vaccine stock at once. Go to Doctor menu > Vaccine > Available Stock.
4. Vaccine due SMS will not be sent to those vaccines which are dependent to other vaccine and marked as NR or Given. Vaccine marked with “Y” or “NR” will be considered as given at other place and will not show in SMS Reminders.
5. Separate print setup is provided for Indoor Bill.
6. Major changes given in Indoor Bill. Indoor Bill items can be added date wise.
 - a. Print for summarized bill and date wise prints are possible
 - b. Changed indoor bill based on TPA compatible module.
 - c. More organized billing summary is added with respect to advance collected, discount, TPA payer amount, remaining amount.
7. Credit notes can be issued to patient to return the payment. This can be possible from 3c Case Register duplicate receipts.
 - a. Credit note can be issued against non-cash payment receipt only
 - b. Credit note can be issued via Cash, Cheque or NEFT
 - c. Separate register export facility provided on 3C Case register to export all credit notes issued. This can be submitted against your daily 3c case register for IT purpose. Find button with name “Export Cr. Note” on 3c Case register screen.
8. View patient last Weight and current Age on appointment screen on patient selection.
9. View patient diagnosis history date wise. Select patient from main screen and then click on Doctor menu > Patient > Patient Diagnosis History.
10. Order of the selected diagnosis from patient treatment can be changed like medicine. Move Up or Down diagnosis. Right click on diagnosis item to perform Up/Down.
11. Only treatment can be printed in Rx. For a case, if you would like to exclude Clinical Notes, then only treatment can be printed by checking “Only Treatment” for Prescription. On Main screen, near prescription button you will find new checkbox for “Only Treatment”
12. Medicine name and dosage will be printed in upper case in prescription print.
13. Along with BMI, new calculator added for BSA. This will display on main screen as well as printed in Rx in Clinical Notes section.
14. New shortcut “CTRL + P” has been added for selection of Back Page Rx, Half Page Rx, Normal Rx option. In case you would like to print prescription on Back page, current you need to use mouse to select Back Page Rx option, now this can be done by using CTRL + P key and then press Enter and choose option for Prescription.

15. Improvement have been made in displaying Last Visited days. Now it will be shown in better format of Year Month and Days format. E.g. Patient is coming after long time then earlier it was displaying difference in days only.
16. On page visit, age of the patient on that visit date will be displayed beside the visit date.
17. Facility is given to select hospital name (maximum 10 characters allowed) for the vaccine administration. This will be useful to identify which place the vaccine was given to patient. This option is available on Vaccine Given date screen. Dropdown is providing, so user can add their own names in it. The names will be printed in vaccine report.
18. Patient reminder is one of the important section, where user mentioned some information about the patient. However, it's not possible to recall or search patient with important reminder. Therefore, new register has been added in Register menu as "Patient Reminder". On this screen, all patient reminder text will be displayed along with patient name, contact number. Search facility is also provided. In case you would like to search patient with reminder text.
19. Advice can be copied into clipboard, to use it at other places. On main screen, open Advice > Click on any advice item from list and click on "Copy Adv Text", it will be copied into Clipboard. Now you can use Paste option to get that advice anywhere in your computer.
20. Patient label print from Word has been improved. Now two columns printing is given with few formatting changes.
21. Pending professional fees of Patient will be only shown for Current Accounting year. In case you would like to see all then option is given to see all pending fees.
22. New screen developed to help new user to know about software important shortcuts. Open it from Help menu > Shortcuts. This will view some of common and important shortcuts key of Main Screen and menu bar.
23. On patient search screen, new search criteria for Company Name in included in other search criteria. In case you would like to search patient by company name, then select Company Name field from other search criteria and then type company initial characters in yellow box and press Enter or click on Search. This will result matching company name patients.
24. Print patient address and contact detail on discharge summary report.
25. For multi terminal patient registration, case number was not displaying to reception after registering patient. For this, once patient is register from Patient Registration it will be display in label beside case number textbox for the information. This is only useful to those who have checked marked on "Multi terminal patient save" option.
26. Date calendar control is provided on missing places in Indoor screens.
27. New fields added as per the IRDA in discharge summary.

Apart from new features, we have fixed few bugs to improve our system as below:

1. Current accounting year was not coming in receipt print beside receipt number
2. Non-cash receipt was not showing in today's patient list
3. Reminder save with long text was throwing error.
4. On selecting new patient from appointment, patient weight was not coming to main screen.
5. Patient address in Rx was not printing in case any of one field contains the address details from Street, Area and City. This has been fixed and now it will print if any of three contains value.

Version 2017 - Post Release Improvements
Latest AXON version is 2017.1.16 on 22nd Feb, 2017.

Bug Fixes:

1. Old indoor bill did not get converted into new indoor bill format
2. Indoor bill search does not working
3. Patient registration shows mobile number alert for every patient when mobile number is not specified.
4. Prescription print was throwing alert for some cases as "invalid argument". This has been fixed
5. Diagnosis print get overlap with clinical notes in half page and back page Rx.
6. Correction in 3c report for head wise printing for only Vaccine and Consultation.
7. Other than cash receipt does not show preview for the receipt print
8. Date calendar does not work on vaccine schedule date change
9. Standard indoor bill selection does not work in new indoor bill format.
10. Indoor bill get saved without which create problem in saving multiple bills for the same indoor patient.
11. Unable to export 3c case register in excel for the head wise.
12. Doctor share calculation on indoor bill does not calculated on Net total (after discount)
13. Medicine fix dosage does not come up in Standard Rx or in Treatment

Improvements & Changes:

1. Indoor bill summary print by standard code wise
2. Indoor bill item code implemented
3. Incorporated indoor item code in charge master
4. Option to set left margin for the patient labels
5. Facility to sort vaccine stock by make and vaccine name
6. Medicine instruction will be shown in regular case instead of upper case
7. Report margin settings for indoor detail bill
8. Export patient area and district information in 3c Reports
9. Show final diagnosis in IPD list screen and exported report.
10. Copy Provisional Diagnosis in Final Diagnosis while making discharge summary.
11. New indicator in appointment for "Late Patient".
12. Option to hide Item date from the detail indoor bill print
13. Show total summary of indoor bill in detail indoor bill print.
14. Header line for address and PAN card will be displayed based on information in detail indoor bill.

Version 2018 – Released in February – Release I

1. Main screen:

- a. Same day visit edit alert is missing:
In last version if patient is registered earlier in the day or saved by doctor we would get a reminder. This is probably missing from this version.
- b. Record visit type of the patient:
Patient visit type should be able to be recorded and show on past visit and history. Such as fresh, followup, vaccination, well baby, routine, emergency and etc. User shall be able to filter visits by type on history screen. Apart from this, default charges can be set for visit type wise so that on main screen based on patient type default charge comes.
- c. Money collection by doctor should intimate to reception:
There is a situation where patient comes inside consulting room and receive prescription print out and save the amount of money to be collected (e.g. consultation rs.200.00). Patient goes outside, receptionist looks the amt in his/her appointment view and collects the money from patient. In some cases, patient gives money directly to doctor in consulting room (usually large amount). So when the patient goes outside, and receptionist ask payment as routine. In this case doctor has to inform receptionist about the payment collection. In order to provide solution for such, we shall introduce a toggle button on main screen while making receipt whether amount is collected or not.
- d. Family member linking from main screen:
An option to link all siblings of a family on main screen

2. Appointments:

- A. Show total visit count of patient on appointment screen:
On appointment screen, when patient selected, show total visit count of the patient along with other information
- B. Separate reminder box for receptionist:
At present we have reminder box for doctors and small box for pending professional fees.
 - li. This pending professional fees amount is seen to receptionist when they enter the case number of the patient.
 - lii. In the current reminder box, we can arrange for a separate sub box for instructions for receptionist (doctor will write the instructions which he wants the receptionist to see e.g. to fill mediclaim form on follow up etc). So receptionist will see two things - 1) pending professional fees and 2) sub box for instructions for receptionist written by doctor in that sub box. And doctor will see and can edit all three things
 - (1) main box
 - (2) sub box for receptionist's instructions
 - (3) pending professional fees

C. Keep history of appointments:

Patient appointment history should be recorded in backend for the future analysis.

D. Record physical examination such as pulse rate, sao2 from reception:

From appointment screen, reception can able to record pulse rate, respiratory rate and sao2 of the selected patient. This recorded vitals will be shown on main screen and rx.

3. Receipts:

A. Lock discount on receipt edit at reception level:

Even after doctor has saved a patient visit receptionist can still make additional discount from reception. This is wrong as days total gets changed without the knowledge of doctor.

B. Amount due box in receipt section on main screen:

Kindly provide amount due in the receipt section. Such that it automatically reflects in the professional fees due list.

C. Avoid duplicate receipt for the same patient on same day at reception:

Software shall give prompt to user while issuing another receipt for the same patient for the day. User shall able to choose whether modify original receipt or issue new receipt. Such facility will avoid duplicate receipt of same patient for the same day in case it was done in mistake.

D. View amount collection per session at reception:

Display total of amount collected session wise at reception.

E. Enhance receipt summary to view patient account (patient ledger):

Give total payment receipt view by patient wise. All receipts received till today from the selected patients should be display along with total.

F. Receipt remarks template:

Kindly provide option to add customization templates while issuing out patient receipts.

(1) e.g.

(2) collect your blood reports within 7 days.

(3) duplicate copy and etc.

G. Receptionist can change the mode of receipt:

Allow reception user to change mode of payment receipt. This option can be enabled or disabled by admin from the options window.

4. Registration:

A. Prompt to update patient details on appointment:

Whenever a patient is visiting after long period, then software shall prompt reception to update important details like mobile and address. Also, software should have option to prompt to complete any empty patient detail and to update them. User can able to configure which are mandatory fields for the patient details in next visit. Prompt can be given at both reception or doctor level.

B. Facility to merge duplicate patient:
There should be an option to merge duplicate registration or at least delete kind of duplicate.

C. Alert for missing information on patient selection:
Mobile number of patient is must now a days in order to use sms feature. For old patient, mobile number is not available and this needs to be address. Software shall give prompt on reception or main screen if no mobile number is available for the patient.

D. Birth weight in pounds:
Sometime doctor receive few kids who are born in uk, where weight is measured in pounds. In this case, we can have option to record birth weight in pounds as well and which then automatically convert into kg.

5. Rx:

A. Number selection window column size to be increased:
Columns size in weight and drug details should be bigger for easy click, now it is small, slight movement of arrow can lead to dangerous wrong high or low dose.

B. Print duration in months instead of days in prescription:
Syrup hemsis 5 ml 1 time a day 90 days
Ii. If days are 30 days or their multiple (60 days or 90 days), can we automatically convert them to months
Iii. Eg.
(1) 30 days gets converted to 1 month
(2) 60 days to 2 months
(3) 90 days to 3 months
Iv. So it will look as syrup hemsis 5 ml 1 time a day3 months

C. Multiple advice can be store for a single range in age related instructions:
Allow user to store multiple age related instructions against a month. In rx, user can able to choose any or all and by default all are selected.

6. Search:

A. Patient search improvements:
For sending group messages, there should be option to select from particular registered number to another number now you have to select all or select individual.

B. Search or filter patients by no. Of visits:
I. Few search criteria for visits number or visit frequency wise as below:
Ii. Filter those case who have shown to us recently [filter by last visit in say last 6 months / 1 year]
Iii. Filter by number of visits [filter those cases who have shown to us say more than 5 times].
Iv. Multilevel filter shall be useful. This feature is useful for those who circulate sms to their patient (say diwali holiday notice) only to those patients who are showing to us regularly and / or recently.

C. Search patients by word in clinical notes:

Allow user to search patient by any word written in the clinical notes (e.g. in past history of the patient, patient had h/o 'breath holding spells'), so patients having similar complains or history can be filtered.

7. Vaccine:

A. Option to disable vaccine inventory warning once new stock is added:

The warning for a vaccine getting over continues to show even after we have entered the new arrived stock till the old stock gets utilized completely which causes confusion. Hence it should get disabled automatically or we should have an option to do so.

B. Add short cut for generating vaccine schedule:

Add short cut key on main screen for generating vaccine schedule.

C. Option to change vaccine charges during vaccination:

During vaccine administration after selecting vaccine from the stock, a desired price can be enter for the vaccination.

D. Vaccine sequence reordering:

In the vaccine schedule, allow user to move the vaccine up/down. So the vaccines are setup in proper sequence in schedule display.

E. Add more columns in vaccine available stock:

I. Add batch no, expiry date.

Ii. Preferably in the order: [vaccine, name, batch no, expiry date, single dose, multi dose]. It would help us while tallying with the physical stock.

F. Vaccine stock report by brand name:

Option to check vaccine units purchased by brand name & sales by brand name & balance / & monthly consumption by brand name in an excel sheet.

8. SMS:

A. Repeated sms should not go to referral doctor:

When any doctor refers a patient to us, first time we send thanks sms and patient is saved with referring doctor name. On subsequent visit save, referring doctor should not get sms.

B. Avoid sending same sms to same mobile number twice:

I. During bulk sms, software shall allow user to choose whether to avoid duplicate sms on same number. In event of sending non personalize sms e.g invitation or greetings, it is advisable that same sms do not repeat on same mobile number (multiple patients register under same mobile as belongs to same family).

Ii. This can be also configure from the sms template. If sms is non personalize then it will not send same sms on duplicate number.

9. Print:

A. Consistent header for discharge summary:

Discharge summary print header should be consistent with opd rx.

B. Improvements for printing hospital logo:

Logo does not get printed properly in proper shape due to space. We need to address proper size details and also print in discharge summary, indoor bills, vaccine and etc.

10. Reminder:

A. Customization for reminder box:

In reminder box, allow user to choose content from the template instead of manual typing. Many times there are common things to write in patient reminder box.

B. Improvements in patient birthday & vaccine reminders:

I. Common view for vaccine and birthday reminder for reception and doctor user.

ii. additionally, show case no, father name and mother name in reminder list.

iii. Add print and export facility for reminder list.

iv. Case will be open on main screen while clicking on any record from the reminder list. (click on case number column)

11. Master:

A. Update holidays online:

Customer shall able to import new calendar from our import utility so that it can be configured for the 2018 year. Hospital holidays need to be configured by doctor.

B. Introduce tapering dose while prescribing rx:

I. Tapering dose or multiple dosages on single medicine shall be possible.

ii. See example:

(1) syp valparin.

(2) 2.5 ml 3 times a day for 7 days.

(3) 2.5 ml 2 times a day for 7 days.

(4) 2.5 ml 1 time a day for 7 days.

(5) 1.5 ml 1 time a day for 7 days.

(6) 1 ml 1 time a day for 7 days.

Then omit

12. Backup:

Improvements in data backup:

Now Axon backup tool provide user to take their software data into Cloud.

Post release changes of v2018:

Date: 20-Feb-2018

1. Highlight previously prescribe medicine while re-selecting waiting patient form appointments
2. Show temperature column in appointment list
3. Show family member in prompt (with reminder)
4. Include age and gender information in family member list
5. Vaccine default sort order column can be set by customer (Actual Date, Group name or Display Order)
6. Last visit prompt has been removed while selecting patient from appointment or LP
7. OPD register age group wise search improved
8. Auto mode improvements in New Backup tool.
9. Bug fix for updating mobile number from main screen.

Date: 16-Feb-2018

10. In multi doctor mode, appointment patient listing view was showing improperly.
11. Runtime error occurred while performing merge patient.
12. In event of incorrect Hospital logo file or file not available at disk, software crash on print setup screen.
13. While updating pending due from main screen, it should also update the date in reminder along with Due amount.
14. Default charges of OPD are not coming on main screen.
15. Clinical notes add new and add sub item, should not show number column
16. Adding new diagnosis from master menu does not update dropdown on main screen
17. Vaccine reminder error
18. Validation alert added on export function of history if no data is there to export.
19. Error occurred while removing age related instructions.
20. Local language dosage instructions are not coming in proper grammar for tapering dosage.

Date: 09-Feb-2018

1. Unable to select patient to send birthday SMS
2. Unable to open vaccine Given Date window due to stock reminder settings.

Date: 08-Feb-2018

3. Existing case number link with family member
4. Font style changes for Diagnosis and Medicine dropdown on main screen
5. Unable to cancel appointment
6. Increase space for signature in indoor bill prints
